- ** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims 1-57	YES
	Claims	NO
Inventive step (IS)	Claims 1-57	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-57	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

The following documents identified in the International Search Report have been considered for the purposes of this report:

D1 US 5453076 A
D2 WO 2000/012168 A1
D3 EP 0363203 A2

Novelty (N) Claims 1-57

Claims 1-57 meet the criteria set forth in PCT Article 33(2) for novelty. The prior art published before the priority date does not disclose an intraluminal inflatable counter-pulsation balloon or chamber and a means to hold the balloon against a wall of the vessel.

Inventive Step (IS) Claims 1-57

The claimed invention is not obvious in the light of any of the cited documents nor is it disclosed in any obvious combination of them. It is also considered that it would not be obvious to a person skilled in the art in the light of common general knowledge either by itself or in combination with any of these documents.

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

1. Claim 7 is not clear because the term "the frame is balloon" is not clear.
2. The scope of several claims is in general not clear because they define features related to how the device is used or how the device is implanted. For example see claims 18 and 21. These claims define no additional features of the device. They merely define how the device is implanted and in what sequence the device is connected to a fluid pressure source.
